**Research Rationale/Question:** Please explain why the study is needed and state a question worthy of research. What do you want to study or examine?

**Review of Research:** Include a review of three to five major, current, relevant research works that support the rationale and provide a theoretical framework for the proposed study. What have other researchers found about this topic that supports the rationale or provides a theoretical framework ?

**Participant selection:** Provide information on the participants, such as number of students, range of ages, grade levels, performance levels, etc.

**Methods and Data Collection:** Describe your approach to data collection (methodology: e.g. quantitative, qualitative, mixed methods) and your rationale for this approach. Explain how you are going to collect data to answer your research question. Describe in detail what you plan to do to gather data and to analyze it. What is the time framework for the study?

**Data analysis:** How will results be reported? Explain in detail how you will analyze the data.

**Feasibility/Budget Allocation:** Itemize and explain the budget requirements of this proposal, within the limitations described in the Guidelines and Rubric.

**References:** Include references (three to five) in APA style. Please see the rubric for additional information.
